

Staying Safe Online (SSO)

To **stay safe** online I will always ask a grown up before I use a device and I will think before I click on icons, links and games

I will **always** keep my personal details (name, address, email, photo, username and password) safe and will not share them.

I will always be kind and polite to my **friends** online and will only connect with people I know.

I understand that not everything I see online will be true **facts** and will always check information before using it.

If things get too much and my brain gets **fuzzy** I know to take time out from my device to stop and breathe.

If I see something that gives me the 'uh oh' feeling, **even** if I am having fun, I will tell a trusted grownup.

At school I will turn off the monitor or turn over my tablet, stand up and put my hand up.
